People Analytics Report

1. Executive Summary

This report presents the findings of a comprehensive **Employee Attrition & HR Analytics** analysis conducted across **7 departments**, covering **120 employee records** during the 2024 calendar year. The analysis reveals critical patterns in workforce turnover, employee engagement, job satisfaction, and retention risk that — if systematically addressed — present an estimated **20–30% attrition reduction opportunity** and a path to **80%+ retention** within 12 months.

Key findings indicate an overall attrition rate of **36.7%**, significantly above the industry benchmark of 15–20%. Work-life balance issues account for **59.1% of all departures**. Legal and Marketing departments record the highest attrition at **50% each**. A structured **8-point improvement roadmap** has been developed to address these findings.

Key Performance Indicators — At a Glance

TOTAL EMPLOYEES 120 120 Active Records	ATTRITION RATE 36.7% 44 Employees Left	RETENTION RATE 63.3% Active Workforce	AVG TENURE 11.1 Yrs Avg Yrs at Company	AVG INCOME \$72.5K Monthly Average
SATISFACTION 6.1/10 Survey Score	ENGAGEMENT 5.8/10 Engagement Index	OVERTIME RATE 47.5% Staff on Overtime	PROMOTION RATE 45.8% Promoted in 2024	TRAINING 100% Training Participation

Report Prepared: June 2026 | Data Period: January – December 2024 | Employees Analysed: 120

2. Key Findings

The HR Analytics analysis uncovered five critical workforce challenges requiring immediate strategic attention:

Finding 1 — Attrition Rate Critically Above Benchmark

The organisation records a **36.7% attrition rate** against an industry benchmark of 15–20%. With 44 employees departing in 2024 out of 120, the estimated replacement cost — at 1.5–2× annual salary per employee — represents a significant financial liability. **Legal (50%) and Marketing (50%)** are most critically affected.

Finding 2 — Work-Life Balance is the Primary Driver

59.1% of all attrition is driven by work-life balance issues. With **47.5% of the workforce on overtime**, a direct causal link exists between excessive working hours and voluntary turnover. Overtime employees show materially higher attrition than their non-overtime peers.

Finding 3 — Lack of Career Growth Drives 25% of Departures

25.0% of departing employees cited lack of growth as their primary reason for leaving. With a promotion rate of only 45.8%, more than half the workforce went unpromoted in 2024. Employees with 4+ years of tenure and no promotion show significantly elevated attrition risk.

Finding 4 — Engagement & Satisfaction Below Critical Threshold

Average job satisfaction stands at **6.1/10** and engagement at **5.8/10**. Employees scoring below 5 on either metric are **2–3× more likely to leave**. The Legal department records the lowest satisfaction at 4.4/10, directly linked to its 50% attrition rate. **50 employees** are categorised as High Risk based on composite risk scoring.

Finding 5 — Manager Quality Impacts Retention

11.4% of attrition is directly attributed to manager conflicts. Employees with manager ratings of 1–2 show disproportionately high departure rates. Improving manager effectiveness through structured training and 360° feedback represents a **high-leverage, low-cost** retention intervention.

3. Department Performance Summary

Department	Employee s	Attrition Count	Attrition Rate %	Avg Salary	Avg Satisfaction	Avg Engagement	Risk Level
Finance	22	6	27.3%	\$79,606	5.8 / 10	5.7 / 10	MEDIUM
HR	20	6	30.0%	\$51,955	7.1 / 10	6.4 / 10	MEDIUM
IT	19	8	42.1%	\$90,898	6.1 / 10	5.9 / 10	HIGH
Legal	10	5	50.0%	\$101,754	4.4 / 10	4.8 / 10	HIGH
Marketing	10	5	50.0%	\$65,673	6.1 / 10	5.8 / 10	HIGH
Operations	23	7	30.4%	\$67,809	6.7 / 10	6.1 / 10	MEDIUM
Sales	16	7	43.8%	\$59,395	5.4 / 10	5.3 / 10	HIGH

Risk Level is a composite of Attrition Rate, Satisfaction Score, Engagement Score, and Overtime Rate. HIGH = immediate intervention required. Colour coding: Red ≥ 40%, Amber ≥ 30%, Green < 30%.

4. Improvement Recommendations

The following 8 recommendations are prioritised by business impact and feasibility, derived directly from the KPI analysis and root cause findings:

#	Finding	Area	Priority	Recommendation	Benefit	Timeline
1	WLB drives 59% of attrition	All Depts	HIGH	Flexible scheduling, hybrid work policy, overtime caps	Attrition-20-25%	Q1 2025
2	Lack of growth (25% of exits)	All Depts	HIGH	Career ladder framework, structured promotion criteria, mentorship	Attrition-15%	Q1 2025
3	Legal & Marketing at 50%	Legal, Mktg	HIGH	Stay interviews, compensation benchmarking, career coaching	Attrition-30%	Q2 2025
4	Manager conflict (11%)	All Depts	MEDIUM	360° feedback programme, leadership coaching for managers	Attrition-10%	Q2 2025
5	Satisfaction <5 = 2.8x risk	HR, Legal, Sales	MEDIUM	Quarterly pulse surveys + departmental action planning	Satisfaction +15%	Q2 2025
6	50 high-risk employees flagged	All Depts	MEDIUM	Personalised stay conversations and tailored retention plans	Retention +10%	Q3 2025
7	Overtime at 47.5% of workforce	IT, Sales, Ops	MEDIUM	Workload audit, headcount right-sizing, task automation	WLB score +20%	Q3 2025
8	Training impact on retention	All Depts	LOW	Structured L&D; roadmap linked to career progression paths	Engagement +10%	Q4 2025

5. Implementation Roadmap

Phase	Actions	Departments	Timeline	Expected Outcome
Phase 1 Quick Wins	Deploy hybrid / flexible work policy Begin overtime tracking & escalation alerts Launch Legal & Marketing stay interviews	IT, Sales, Legal, Marketing	Q1 2025	Attrition -15% WLB score +10%
Phase 2 Structural	Deploy career ladder framework 360° feedback for all people-managers Launch quarterly employee pulse surveys	All Departments	Q2 2025	Satisfaction +15% Promotion rate +20%
Phase 3 Engagement	Retention plans for 50 high-risk employees L&D; programme linked to career paths Manager coaching programme	HR-led, All Depts	Q3 2025	Engagement +15% Retention +10%
Phase 4 Continuous	Monthly attrition KPI dashboard reviews Predictive attrition modelling HR process governance framework	All Departments	2026+	Attrition <20% 85%+ retention

6. Methodology

Workforce Profiling

Documented 120 employee records across 7 departments profiling by demographics, salary band, education, tenure, performance, satisfaction, engagement, overtime, and promotion status.

KPI Framework

Defined 10 performance KPIs — Attrition Rate, Retention Rate, Avg Tenure, Avg Salary, Satisfaction Score, Engagement Score, Promotion Rate, Overtime Rate, Training Rate, and Department-wise Attrition — providing a complete picture of workforce health.

Risk Scoring

Built a composite Risk Score (0–10) based on 6 weighted factors: satisfaction, engagement, overtime, promotion status, manager rating, and work-life balance. Employees scoring 6+ = High Risk.

Root Cause Analysis

Cross-referenced attrition outcomes with satisfaction, engagement, tenure, overtime, and promotion data to distinguish structural causes from individual outliers.

Cost & Improvement Analysis

Estimated financial impact of attrition at 1.5–2× annual salary per departing employee, enabling ROI modelling for proposed retention interventions. Each recommendation was tagged by category to quantify the opportunity landscape.

7. Conclusion

The Employee Attrition & HR Analytics Dashboard analysis reveals a significant opportunity for workforce transformation. By systematically addressing the 8 identified priority areas — spanning work-life balance, career development, engagement, manager effectiveness, and compensation — the organisation can realistically achieve:

- Attrition rate improvement from **36.7% to below 20%** within 12 months
- Retention improvement from **63.3% to 80%+** through targeted engagement interventions
- **20–30% reduction** in replacement and recruitment costs through proactive retention
- Satisfaction improvement of **+15%** through structured pulse surveys and action cycles
- **50 high-risk employees retained** through personalised development and stay conversations
- Standardised, documented HR processes enabling **scalable, data-driven workforce management**
